EasyTouch

Turnstile & gate remote control console with an intuitive graphical user interface

EasyTouch is our next generation remote control console specifically designed for reception and security desk applications. The EasyTouch easily manages and controls large groups of turnstiles, gates and 3rd party devices and has a space saving compact design with an intuitive graphical user interface.

The user friendly 10" touch screen requires minimal training for proficiency in navigating the various pages, remotely controlling the passage lanes and understanding the real time feedback such as alarm events when unauthorized access is detected.
The EasyTouch display immediately indicates which turnstile / other device is in the alarm mode. The EasyTouch screen has a visual cue allowing the user / operator to quickly respond to the event.

You can easily set different operation modes of turnstiles / other devices.

EasyTouch graphics is also available in Light and Dark mode to be chosen by each user.

Benefits

- An intuitive Graphical User Interface
- Activation of Emergency Mode via a virtual control button
- Reporting of current state
- Compact and elegant housing
- Large number of controlled lanes scalable to the specific site layout
- Lane settings and configuration can be controlled directly from the EasyTouch console
- Password lockout when unattended
- Elegant bracket
- Optional WiFi connection
- Control of 3rd party devices (barriers, sliding doors, etc.)
